Guppyshow-Manager (Version 1.46)

Authored by: Tim Herrmann

Introduction

This manual describes the usage of the Guppyshow-Manager in version 1.46.

To use the software, an online connection and a modern browser (e.g. MS Edge, Google Chrome) must be available. To be able to print out the results an appropriate printer is needed. Judges will also need a smartphone, tablet or notebook with an online connection to record their score. That's it for required items. With the complete use of PHP without further auxiliary programs a simple use of the software is server based and thus platform independent possible.

The program was created in much more than 1,000 programming hours using PHP 8.2, HTML and MySQL. In the latest version, it is now located in its own SSL-encrypted domain (<https://guppyshow-manager.de>). With the latest version, the database now runs on MariaDB 10.11. Some possible operating errors have been fixed and the database is now completely backed up in several places for security reasons during the program run.

In December 2025, our homepage provider surprised me with a necessary change from PHP version 8.1 to 8.2. A function used for PDF reports was declared outdated. Therefore, all PDF reports were consistently converted to UTF-8 font. All characters can now be printed in the PDF. This means that Czech special characters, for example, can be displayed both in the browser and in the PDF. The trainee report has now been refined (upper and lower values of the three judges' scores, more meaningful percentages and standard deviation).

This manual is intended to make it easier for the user to operate the program and to enable the user to set up and run a Guppy exhibition on his own.

Changes compared to the previous version 1.43 are highlighted in light blue.

Berlin, 04 February 2026

Tim Herrmann

Prospects

With the current version 1.45, the development of the programme has been completed to a large extent. The option to sort sets and assign them to corresponding tank numbers in advance has now been added to the preparation of shows. For the administrators, the merging of breeders has been greatly improved, it is now also checked whether the breeder in question has judged, managed or observed a show. Furthermore, it is now very easy to back up and restore the database. This ensures a high level of security for the program in the future.

Since version 1.31, the programme also offers a complete season evaluation "at the push of a button". The ideal prerequisite would be for all exhibiting clubs to use the software. However, in the event that some clubs prefer their own software, a tool for manually recording results from other events has been integrated to still allow a complete season evaluation.

The following points are still being planned:

- CSV export of results
- Advise the judge of any conspicuous outliers in the evaluation
- Possibly a live ranking during the evaluation to make online shows more interesting
-

My mother language is German. I apologise for any mistakes in the English translation. If you would like to improve this translation, please contact me at info@guppy-zuechter.de and I will be happy to send you the text file for editing.

Berlin, February 2026

Best regards

Tim Herrmann

I. – Registration

Only registered users can log in to the program. The registration takes place under guppyshow-manager.de/register.php.

The image shows a registration form for 'GUPPYSHOW-MANAGER'. The background features a large orange fish and a smaller yellow fish. The form is titled 'Registrierung / Registration' and contains three input fields: 'E-Mail:', 'Dein Passwort / Your password:', and 'Passwort wiederholen / Repeat password:'. A 'Senden/Send' button is at the bottom. Three numbered yellow boxes with red arrows point to the input fields: box 1 points to the E-Mail field, box 2 points to the password field, and box 3 points to the repeat password field.

- 1 Enter your email address
- 2 Enter a password of at least 8 digits
- 3 Repeat the password

Please note that this is case sensitive.

I. – Registration

The registration of a user is only completed when an administrator releases the user. This is done for security reasons to prevent unauthorized access.

When the registration form is sent, an email is sent to the administrator. The administrator will activate the account accordingly. If necessary, he will ask questions to the registered email address in order to find out whether a member of the IKGH is hiding behind the email address.

With successful activation, the software automatically sends an email to the now successfully registered user.

II. – Login

Enter in your browser the link guppyshow-manager.de.

- 1 Select the desired language
German, English and Polish (still unfinished) are currently available.
- 2 Confirm your choice with the "Send" button
- 3 Under the link "Dokumentation / Documentation" you can always go to the latest user guide
The direct link to the documentation is guppyshow-manager.de/info.html .

II. – Login

The screenshot shows the login interface for GUPPYSHOW-MANAGER. The background features a large orange fish. The title 'GUPPYSHOW-MANAGER' is at the top, followed by 'LOGIN'. There are two input fields: 'E-Mail:' and 'Your password:'. Below these are two buttons: 'Submit' and 'Password forgotten?'. At the bottom, there is a blue underlined link 'Documentation'. Five yellow boxes with red numbers and arrows point to specific elements: 1 points to the 'E-Mail:' label, 2 points to the password input field, 3 points to the 'Submit' button, 4 points to the 'Documentation' link, and 5 points to the 'Password forgotten?' button.

- 1 Enter your registered email address
The registration procedure is described in point I.
- 2 Enter your password and
- 3 Confirm your input with the button "Submit".
- 4 Under the link "Documentation" you can go to the latest user guide
- 5 Assigning a new password via the "Forgotten Password" function
This function can be used to send a link to the stored email address, which can be used to assign a new password.
The link is valid for 24 hours.

Neues Passwort für den Guppyshow-Manager

Hallo,

für deinen Zugang zum Guppyshow-Manager wurde ein neues Passwort angefordert. Um ein neues Passwort zu vergeben, rufe innerhalb der nächsten 24 Stunden den folgenden Link auf:

<https://guppyshow-manager.de/passwortneu.php?userid=>

Sollte dir dein Passwort wieder eingefallen sein oder hast du dies nicht angefordert, so bitte ignoriere diese E-Mail.

Herzliche Grüße,
Tim Herrmann

Hello,

a new password has been requested for your access to the Guppyshow Manager. To set a new password, visit the following link within the next 24 hours:

<https://guppyshow-manager.de/passwortneu.php?userid=>

If you remembered your password or did not request it, please ignore this email.

Kind regards,
Tim Herrmann

After a short time, the program sends an email with a link that is valid for 24 hours.

With this link it is possible to assign a new password and at the same time the access will be unlocked if necessary.

Neues Passwort vergeben / Set a new password

GUPPYSHOW-MANAGER

Passwort wurde erfolgreich geändert / Password has been changed successfully

Start Guppyshow-Manager

III. – Main menu

- ☒ Start of a new show
- ☐ Continue a show
- ☐ Evaluate a show
- ☐ Evaluate the season
- ☐ Management of program and user

Submit

Logout

1 Start new show

A new exhibition can be created here.

2 Continue a show

If an exhibition has been interrupted or a prepared exhibition is now to be started, then this point is to be selected. Only the self created exhibitions can be continued. If another user should be able to edit the self created show this is possible under point 5 - Administration of program and user. Completed shows are no longer displayed here.

3 Evaluate a show

Here all users can view the evaluation of all completed (finalized) exhibitions. The respective exhibition can no longer be changed.

4 Evaluate the season

Here the season evaluation and the manual entry of exhibition results outside of this program is possible.

5 Management of program and user

The release of users (only by Admin) and another user for the own exhibition authorize takes place here.

Button "Logout" leads to the termination of the program.

Confirm your input with the button "Submit".

IV. – New show

Capturing the exhibition data

Day of evaluation (form: DD.MM.YYYY)	10.10.2022
Exhibiting club:	GZD
Place of Exhibition:	Berlin
Show data:	1st show of the European Championship 2022 - Pairs
Additional information:	www.ikgh.org
Show type:	Pair Trio Both ☐ Online

1 Day of evaluation by the judges

Days in the future are also possible. An alignment with the Gregorian calendar takes place.

2 Exhibiting club

Currently only IKGH clubs are stored and can be selected by dropdown. Default is GZD.

3 Place of Exhibition

Is a text field and appears later in the evaluation PDF.

4 Show data

Is a text field to enter e.g. the description of the exhibition. Visible in the evaluation PDF.

5 Additional information

An optional text field to enter additional data. Also visible in the evaluation PDF.

6 Show type

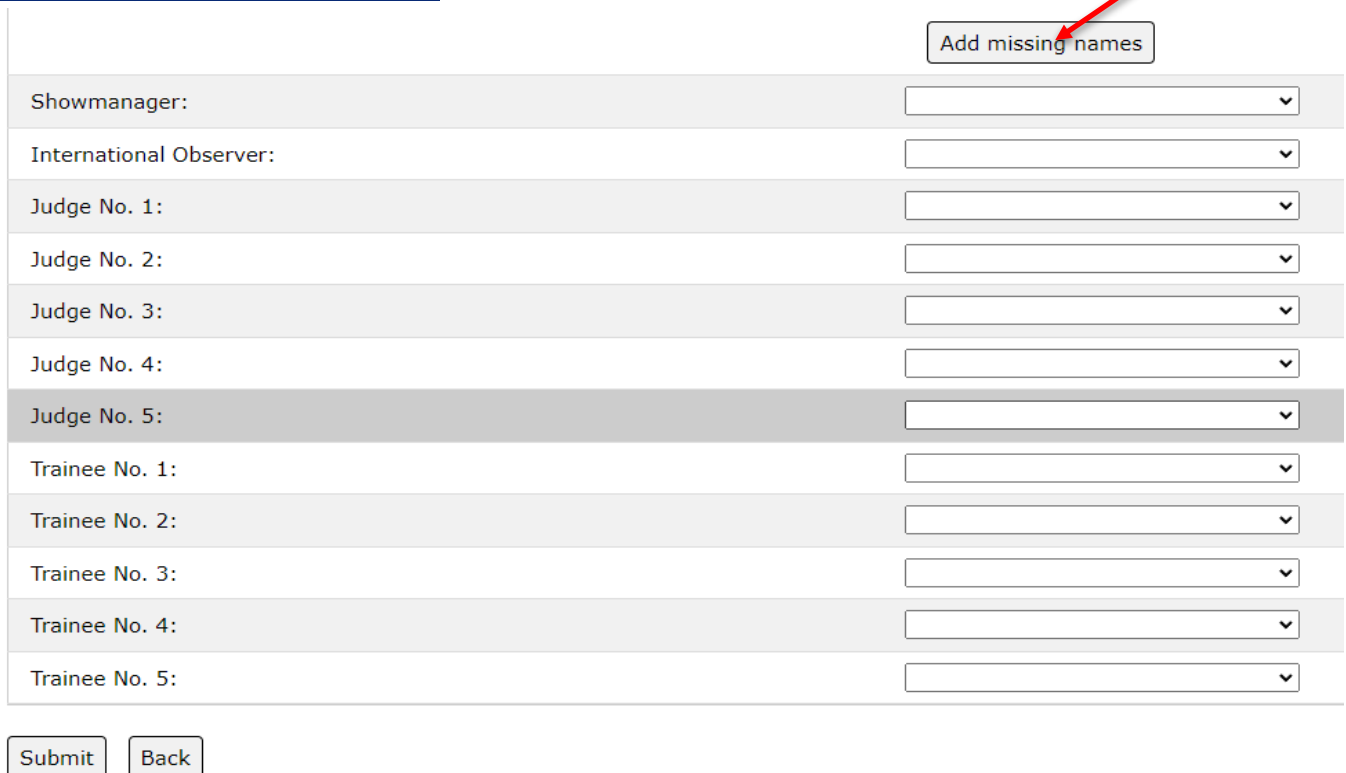

Pair and trio exhibitions are currently possible, or both at the same time.

7 Online

With a check here, the special disqualification reasons for online exhibition replace the normal reasons for disqualification in face-to-face events.

IV. – New show

Capturing the exhibition data

The screenshot shows a form for capturing exhibition data. At the top right, a yellow box with the number '8' and a red arrow points to a button labeled 'Add missing names'. The form contains several rows, each with a label and a dropdown menu:

Showmanager:	
International Observer:	
Judge No. 1:	
Judge No. 2:	
Judge No. 3:	
Judge No. 4:	
Judge No. 5:	
Trainee No. 1:	
Trainee No. 2:	
Trainee No. 3:	
Trainee No. 4:	
Trainee No. 5:	

At the bottom of the form, there are two buttons: 'Submit' and 'Back'.

8 Button “Add missing name”

This button leads to a mask in which additional names or judges can be added if they are missing in the following drop-down fields. See next page.

9 Show manager

Select the show manager from the dropdown field. For all dropdown fields the initial letter can be marked by tapping a letter.

10 International observer

In the dropdown field the choice by all judges is also available, if there is no International Observer. This is currently allowed according to the IHS.

11 - 15

Selection of judges

16 – 20

Selection of optional trainee judges.

Button "Back" leads back to the main menu.

Button "Submit" saves the data and leads to the control of the entered data.

IV. – New show

Add missing names

Recording of a new breed. **1**

Last name / Surname: **2**

First name: **2**

Breeder's club: **3**

Country of breeder (ONLY for the exceptional case: no club OR national championship, but breeder in foreign club): **4**

6 **5**

Save Back

The form contains six numbered yellow boxes with red arrows pointing to specific fields: Box 1 points to the title 'Recording of a new breed.'; Box 2 points to both the 'Last name / Surname' and 'First name' input fields; Box 3 points to the 'Breeder's club' dropdown menu; Box 4 points to the 'Country of breeder' dropdown menu; Box 5 points to the 'Save' button; and Box 6 points to the 'Back' button.

In order to add a judge, a breeder or a show manager etc., the details of this person must now be added here.

1 Last name of the new person

Please remember to capitalize the first letter.

2 First name of the new person

Please remember to capitalize the first letter.

3 Set the person's IKGH club using the dropdown.

For IKGH clubs, the country of the person is automatically set based on the club when saving. The country can therefore be left blank.

4 Country of the breeder (!! only if person does not belong to an IKGH club !!)

If the new person does not belong to an IKGH club, field 3 must be left empty and an entry from the country list must be made here. Another exception would be, if a country championship is to be held, but the breeder belongs to a foreign club, then the club would be left blank and the country would be set. Attention, currently a country championship is not yet evaluable in the program, because no filtering of the evaluation can be done yet. Missing countries can currently only be entered via the administrator.

The country code is abbreviated according to ISO 3166 - for example DE for Germany.

IV. – New show

Add missing names

- 5 With the button "Save" the new person is saved in the database and is also available for the following exhibitions.
- 6 With button "Back" the mask is left without saving and jumps back to the creation of the new exhibition.

Since the new names are also saved for the future, please pay attention to exact spelling. If a name from the list is misspelled, please request a correction via the administrator or create a new person with correct spelling.

At the moment it is deliberately NOT possible to delete a person, as this may make it impossible to evaluate the season.

IV. – New show

Control of the show data

Recorded show data

Day of evaluation (form: DD.MM.YYYY):	10.10.2022
Exhibiting club:	Guppy-Züchter Deutschland (GZD - DE)
Place of Exhibition:	
Show data:	
Additional information:	
Show type:	Pair
Showmanager:	
International Observer:	
Judge No. 1:	
Judge No. 2:	
Judge No. 3:	
Judge No. 4:	
Judge No. 5:	
Trainee No. 1:	
Trainee No. 2:	
Trainee No. 3:	
Trainee No. 4:	
Trainee No. 5:	

Required data is missing!

1 Control display of the entered data

In the control view, it is now to be checked whether all exhibition data have been entered correctly. The program offers a certain degree of support. For example, continuing in the program (point 4) is only allowed if certain minimum standards are met.

2 Hint line

The hint line clarifies possible errors according to IKGH. The user is solely responsible for the correctness of the IKGH display. A red line indicates missing minimum standards, without which the program would not function properly. A yellow hint line indicates errors according to IKGH, but still lets the user continue.

3 If corrections are necessary, then press this button.

4 This button is only activated if the minimum requirements have been entered. The user will now continue with the entry of the submitted issuance records.

V. – Recording of the show entries

Recording of the show entries

Finalise capture

Entries already recorded

Selection	Type	Entry No.	Breeder	Category Standard	Activ?	Back to breeder
-----------	------	-----------	---------	-------------------	--------	-----------------

- 7 A record disqualification can be entered here (dropdown).
The selectable reasons differ depending on the type of exhibition (presence or online).
- 8 Entering the record number
Numbers between 1 - 999 can be entered. The program automatically counts one number each time a record is saved. It is important to note that the same numbers can be assigned for both pair and trio sets.
In the next step VI - Preparing of the evaluation, the set numbers are then assigned to the tank numbers. Currently, set number = tank number is set automatically. In a later version, it will be possible to sort by standard and color and thus assign other tank numbers to the set numbers.

V. – Recording of the show entries

Recording of the show entries

Finalise capture

Show entry

Mainmenu

- 1 After capturing at least one block, the "Finish capturing" button is activated (orange color).

With this button the entry of the sets is finished and it goes to the preparation of the show. However, it is still possible for the judges to call up the entry of the show sets again for changes, deletions or additions of sets, then basins, during the evaluation phase.

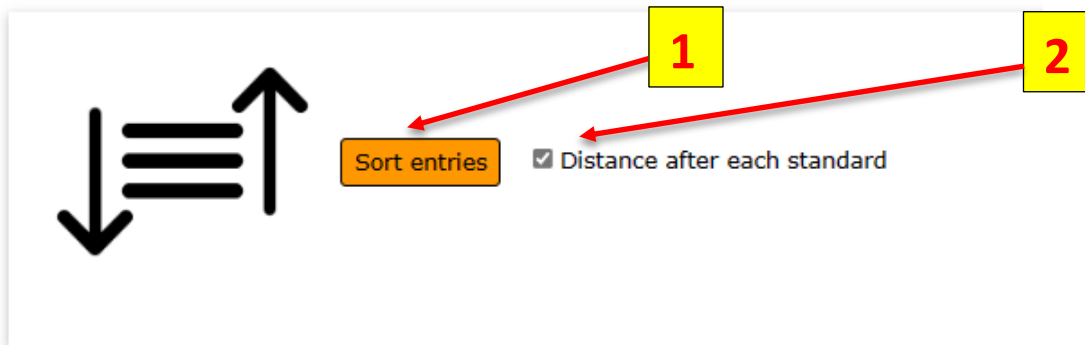

VI. – Preparing the evaluation

The screenshot shows a web interface for preparing an evaluation. It includes a 'Back and Enter corrections' button at the top left. Below it is a section for sorting entries, with a 'Sort entries' button and a checked checkbox for 'Distance after each standard'. A red arrow labeled '1' points to the 'Back and Enter corrections' button, and another red arrow labeled '2' points to the 'Sort entries' button. The next section shows the 'currently uploaded club-logo' as the GZD logo. Below this is a file upload section with buttons for 'Datei auswählen', 'Keine Datei ausgewählt', and 'Logo upload'. A red arrow labeled '3' points to the GZD logo. Below the upload section is a 'Create tank cards' button, with a red arrow labeled '4' pointing to it. The bottom section is titled 'Final control of the judges to be unlocked:' and contains a table with rows for 'International Observer:', 'Judge No. 1:' through 'Judge No. 5:', 'Trainee No. 1:' through 'Trainee No. 5:'. A large blue rectangle obscures the names in the first three columns of this table. A red arrow labeled '5' points to the 'Logo upload' button. A red arrow labeled '6' points to the 'Trainee No. 4:' row in the table. At the bottom left is an 'Activate judge and start evaluation' button.

- 1 Back to enter more records.
- 2 The entries can be sorted here before they are assigned to the tanks. Without sorting, the number of the tank corresponds to the number of the entry.
- 3 The currently stored image of the club. *If no image is stored, a default image is displayed. Only club logos in JPG or PNG image format can be uploaded. The uploaded images are automatically scaled and displayed in the evaluation PDF afterwards.*
- 4 Here you can view the preparation tank cards as PDF files.
- 5 If changes need to be made to the judges or trainees, you can use the button to go back to the recording of the show data and correct the judges/trainees.
- 6 Starting the evaluation and activating the judges.

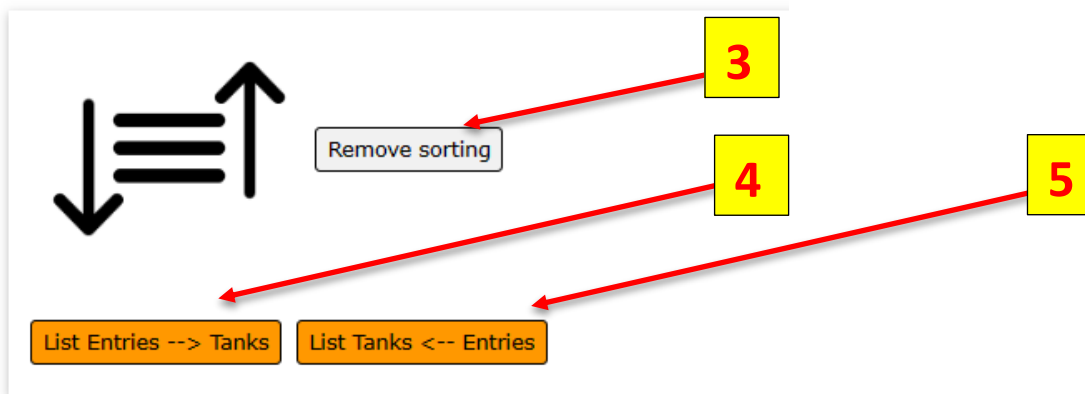

VI. – Preparing the evaluation

View before the sorting process

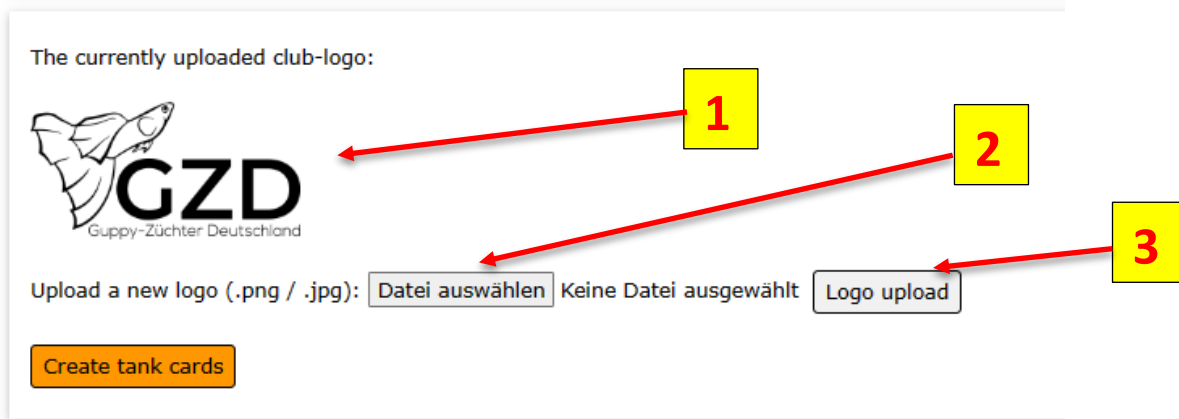

- 1 This button is used to sort the entries
The following order applies: Pair/Trio, Standard, Cover color 1, Cover color 2, Base color
- 2 Here you can define whether the tanks should be sorted directly one after the other or whether a space of 20 tanks should be inserted between each standard in order to be able to insert any later incoming entries between them (by default no insert distance is set!).

View after sorting

- 3 This button can be used to undo the sorting!
The sorting is only final at the start of the evaluation and can then no longer be reversed.
- 4 Display of the list (PDF) with the sorted entries numbers for the respective tank numbers
- 5 Display of the list (PDF) with the sorted tank numbers for the respective assigned numbers of the entries

VI. – Preparing the evaluation

- 1 The currently stored image of the club. *If no image is stored, a default image is displayed. Only club logos in JPG or PNG image format can be uploaded. The uploaded images are automatically scaled and displayed in the evaluation PDF afterwards.*
- 2 Press this button to select an image file of the Exhibitor Club logo on the computer you are using.
- 3 This button uploads the selected file to the Showmanager server.

5	E	Pair	Trio	Reset PIN	Handout	Change	Delete

0%

4 The "PIN reset" button can be used to remove any lock on the respective judge. *This lock can happen if the judge enters the wrong dial-in PIN 3 times during his dial-in. With the QR code or the link on the handout, a wrong entry can be completely avoided.*

5 With the "Handout" button, a completely new handout with a new PIN can be generated for the respective judge. The judge now also has 3 PIN incorrect entries free again.

6 With the button "Change" a new judge can be defined.

The same dial-in applies for the new judge as for the previous judge. If necessary, a new handout can be generated afterwards. This option can be used to replace a judge if necessary. Only the last selected judge appears in the evaluation PDF documents.

At this point, the program no longer checks whether the criteria of a European Championship run according to IHS are met.

VI. – Evaluation overview

- 7 With the button "Delete" a judge can be deleted completely.

Attention: All previous evaluations of the respective judge will be deleted IMMEDIATELY! In part 3, empty judges and trainee positions can be reassigned.

- 8 The progress bar.

Here you can read in percent how many pools have already been evaluated. At this point, the button "Switch to report overview" appears only after all pools have been evaluated. With this button, the user can now access the final reports of the finished evaluated exhibition (see VII. Evaluation overview).

Note: It may take a moment to call up the report overview.

The same information is available in section below for possible trainees.

Note: The trainees do not have to evaluate all the tanks. The program only checks if all judges have scored in order to switch to the evaluation view.

VI. – Evaluation overview

Part 2 – Management of disqualified tanks

State	Type	Tank No.	Category Standard	Reason	Disqualification
NEW	☐ Pair ☐ Trio				NEW
Disqualified	Pair	11	A2-1-8(11)	(1) Dead on arrival	Remove Change reason
Disqualified	Pair	14	A2-1-10(5)	(1) Dead on arrival	Remove Change reason
Disqualified	Pair	26	A2-1-15	(4) Dead or sick in show tank	Remove Change reason

1 Status column - three states are possible here.

NEW - in this line new disqualifications can be entered by the show manager via the button "NEW" (2). These tanks will then no longer appear in the judges' evaluation list.

Disqualified - These are the already entered disqualifications which can be released again for evaluation with the button "Cancel" (3).

With the button "Change reason" (4) the disqualification reason can be changed at any time.

State	Type	Tank No.	Category Standard	Reason	Disqualification
Suggestion	Pair	2	A2-3-18(1)	(7) Different basic colours	Judge No. 1 Confirm Disapprove
NEW	☒ Pair				NEW

Suggestion - This always appears in red and an action on the part of the show manager is necessary, otherwise no final evaluation is possible!

The proposal of the judge named here (in the example judge no. 1) must be confirmed by means of "Confirm" or rejected by means of "Disapprove". It is recommended to have a conversation with the proposing judge.

VI. – Evaluation overview

Part 2 – Management of disqualified tanks

The screenshot shows a web form titled "Management of disqualified tanks". Above the form, four yellow boxes with red numbers 6, 7, 8, and 9 have red arrows pointing to specific fields. Box 6 points to the "Type" field, box 7 to the "Tank No." field, box 8 to the "Category Standard" field, and box 9 to the "Reason" field.

State	Type	Tank No.	Category Standard	Reason	Disqualification
Suggestion	Pair	2	A2-3-18(1)	(7) Different basic colours	Judge No. 1 Confirm Disapprove
NEW	☒ Pair				NEW

- 6 Here you can see whether the tank is a pair or trio. Can be selected in case of a new disqualification.
- 7 The tank number. To be entered for a new disqualification.
- 8 The coding. Set based on the previously recorded pool data.
- 9 And the disqualification reason. To be recorded for a new disqualification.

For online exhibitions, the corresponding possible reasons for online exhibition disqualifications are selectable.

Note: Currently, when pressing the "NEW" button without correct or complete data, no further effect or hint is programmed. This point is already on the ToDo list for further improvements.

VI. – Evaluation overview

Part 3 – Additional actions

The screenshot shows a list of six numbered actions, each with a corresponding button or form element:

- (1) A button labeled "Show tank cards again".
- (2) Two buttons: "List Entries --> Tanks" and "List Tanks <-- Entries".
- (3) A form with the text "Add open judges:" followed by a dropdown menu, the word "as", another dropdown menu, and a button labeled "add now".
- (4) A button labeled "Management of tank entries".
- (5) A button labeled "Interim evaluation".
- (6) The text "Auto-Refresh" followed by a button labeled "activate".

- 1 With this button the preparation basin maps can be displayed again. For example, this makes sense after changes in the tank entries, which can be implemented via point 3.
- 2 The lists with the sorting can be called up again here.
- 3 If judge or trainee places are unoccupied, new judges or trainees can be added in the current or started evaluation.

Attention: If a judge or trainee who is not yet in the database is to be added. A small detour via the administration of the tank entries (point 3) is necessary. There a new breeder or name can be entered. This is then selectable after the return to the evaluation overview.

- 4 In the current evaluation (!) also still tanks can be changed. Thus, additional sets / tanks can be recorded, existing tanks can be corrected or changed. For this purpose, it is possible to return to the tank management. See from page 15 - section V. Entry of exhibition sets. However, no disqualified tanks are displayed.
- 5 The button "Intermediate evaluation" makes a view of the already completed individual judge evaluations possible.
- 6 Here the automatic update every 2 minutes can be activated and then deactivated again.

VI. – Evaluation overview

Part 3 – Additional actions

Interim evaluation

Back

Pair

Tank No. 1 Judge No.	Score	Body Length	Body Shape	Body Colour	Caudal Length	Caudal Shape	Caudal Colour
1	80	4	5	8	7	15	12
2	70	3	4	7	7	11	13
3	89	5	6	10	10	16	12
4	83	4	6	9	7	15	12
5	80	3	5	7	9	15	11
Tank No. 2 Judge No.	Score	Body Length	Body Shape	Body Colour	Caudal Length	Caudal Shape	Caudal Colour
1	80	4	5	8	7	17	12
2	65	5	3	8	6	12	8
3	93	6	6	10	10	16	13
4	78	4	5	8	7	15	11
5	80	5	4	9	7	14	10
Tank No. 3 Judge No.	Score	Body Length	Body Shape	Body Colour	Caudal Length	Caudal Shape	Caudal Colour
1	91	6	6	9	8	18	12
2	83	6	7	8	8	16	12
3	90	6	6	10	8	15	13
4	89	6	7	10	7	15	12
5	83	5	6	9	7	14	11

The interim evaluation shows the individual ratings in the respective categories for each judge and trainee. Such an evaluation is currently not yet available as a PDF report. For the trainees, however, there is an even more detailed PDF report in the evaluation overview.

VII. – Report Overview

Report overview

The screenshot shows the 'Report overview' interface. At the top left, there are two buttons: 'Pair' and 'Trio'. A red arrow labeled '1' points to the 'Pair' button. Below this is a sidebar menu with sections 'Adjustments' and 'Report'. The 'Adjustments' section includes 'Report headers', 'Report language', 'Set filter for country', 'Set filter for club', and 'Set filter for main foreground colour'. The 'Report' section includes 'Final tank cards with results', 'Ranking by categories (Breeders best)', 'Standard winner', 'Show winner', 'All scores by standard', 'Participant report', 'Disqualifications', 'Certificates of participation', 'Trainee report', and 'Judge details report'. At the bottom of the sidebar are three buttons: 'Back to the evaluation overview', 'Save evaluation', and 'Mainmenu'. A red arrow labeled '2' points to 'Back to the evaluation overview', '3' points to 'Save evaluation', '4' points to 'Mainmenu', and '5' points to the 'Judge details report' link. On the right side, there is a 'Selection' section with a 'Modify' button and a 'Preliminary' button. A red arrow labeled '7' points to 'Modify' and '13' points to 'Preliminary'. Below this is a language dropdown menu set to 'English' with a 'Submit' button. A red arrow labeled '8' points to the language dropdown. Below that are two more dropdown menus, each with a 'Submit' button. Red arrows labeled '9' and '10' point to these dropdowns. Below them are two more dropdown menus, each with a 'Submit' button. Red arrows labeled '11' and '12' point to these dropdowns. At the bottom right, there is a 'Link to report' section with several 'LINK' buttons. A red arrow labeled '3' points to one of these links. Below the links is a 'New signature' button. A red arrow labeled '12' points to this button.

- 1 Change from pair to trio reports or back. If it is both a pair and a trio show. In the example, Pair is selected and you can switch to Trio reports.
- 2 If the exhibition has not yet been completed, you can switch back to the evaluation overview and enter any changes there.
- 3 By clicking on the links, the corresponding PDF report is displayed in a new browser tab and can be saved or printed.
- 4 With the button "Save evaluation" the evaluation possibility of the judges is deactivated. However, they can be reactivated via PIN reset until the end of the show. The show can now be included in the season evaluation. The show data can still be changed.
- 5 You can return to the main menu at any time.

-
- 6 After finishing and saving the evaluation, the buttons "Historicizing of the show" and "Send data to IKGH (email)" appear instead. With send data to IKGH an automatic email with the most important preliminary (!) reports is generated and sent to the president of the IKGH. Attention: For pair/trio exhibitions only the reports of the currently activated exhibition type (e.g. pair) will be sent.

The button "Historicizing of the show" also generates an email to the IKGH President. Here, however, for pair/trio exhibitions, the reports are sent for both exhibition types. In addition, the exhibition is closed and can no longer be changed.

The step "Historicizing of the show" should only be done a few days after the results have been published for the first time, in order to wait and see if there are still errors to be corrected.

Back to the evaluation overview

Historicizing of the show

Send Data to IKGH (Email)

Save and mainmenu

- 7 With "Modify" the PDF headers can be adjusted again at this point.
- 8 The language of the reports can be changed here.
- 9 At this point a filter for a breeder country can be set. Only breeders of the selected country will be displayed and evaluated in the reports. For example, an additional evaluation for a national championship within the framework of a European championship run is possible.
- 10 At this point a filter for a breeder club can be set. For example, an additional evaluation for a club championship within the framework of a European championship run is possible.
- 11 Here you can set a filter for the main foreground colour. In this way, an evaluation can be created only for a certain colour.
- 12 This button can be used to add a signature to the participant certificates
The following screen is analogous to the menu item "Upload image" on the next page.

- 13 This switch can be used to deactivate/activate the "Preliminary - not final" note in the margin of the PDF reports for an issue that is not yet finalized. The default is that the note is always displayed. See also point 5.

Tank and filter selection

The screenshot shows the 'GUPPYSHOW-MANAGER' interface. At the top right, a blue button labeled 'Phone' is marked with a red arrow and a yellow box containing the number 1. Below it, the text 'optimized for' is followed by a yellow box with the number 2. The main display area shows 'GZD-Show (Germany)' with a red arrow and yellow box 3, 'Berlin at 03.10.2022' with a red arrow and yellow box 3, and 'Judge No. 1 --- Je [redacted]' with a red arrow and yellow box 4. Below this is a horizontal line. Under the line, there is a radio button labeled 'Pair' with a red arrow and yellow box 5. Below that is the text 'Which tank of the show should now be evaluated ?' with a red arrow and yellow box 6. Below this is a dropdown menu labeled 'Tank No.' with '1' selected, a red arrow and yellow box 7, and the text 'Show only tanks of the following standard.' with a red arrow and yellow box 7. Below this is a dropdown menu labeled 'No filter' with a red arrow and yellow box 8, and a button labeled 'Use filter' with a red arrow and yellow box 8. At the bottom left are two buttons: 'Submit' and 'Logout'.

- 1 The display is optimized for smartphones by default. Through this button, you can switch between desktop and smartphone optimization for the display.
- 2 Display of show data (club and country).
- 3 Display of place and day of judging
- 4 Judge or trainee number and name
- 5 Selection whether to start with trio or pair, here only pair for selection
- 6 With which tank number should be started with the evaluation
- 7 It is possible to set a filter according to standards, for example only triangle standard tanks are displayed. The filter can be selected here.
- 8 The filter selection is confirmed with Apply filter.

IX. – Judges evaluation module

Tank and filter selection

The screenshot shows the 'Tank and filter selection' interface of the GUPPYSHOW-MANAGER. It includes a header with the site name and a device optimization button. The main content area displays show details (GZD-Show (Germany), Berlin at 03.10.2022) and a judge selection dropdown. Below this is a 'Pair' radio button and a question 'Which tank of the show should now be evaluated?'. A 'Tank No.' dropdown is set to '1', followed by a filter section with 'No filter' and 'Use filter' options. At the bottom are 'Submit' and 'Logout' buttons. Red arrows and yellow numbered boxes (1-10) point to specific UI elements: 1 points to the 'Phone' button, 2 to the show name, 3 to the date, 4 to the judge dropdown, 5 to the 'Pair' button, 6 to the evaluation question, 7 to the 'Tank No.' dropdown, 8 to the filter options, 9 to the 'Submit' button, and 10 to the 'Logout' button.

- 1 The desired show is selected with the selection.

Only shows that have not yet been finalized are displayed, which have been created by the user himself or have been activated for him.

- 2 The data displayed should enable the user to find the correct show.
- 3 With "Submit" the selection is confirmed

Depending on the status of the selected show, the user ends up in

- Entering the exhibition data (IV.)
- Capture of exhibition records (V.)
- Evaluation overview (VI.)

- 4 With "Back" the user returns to the main menu.

- 5 With "Wastebasket" the selected show is moved to the wastebasket.

Only an administrator can finally delete the wastebasket or reactivate the exhibition from the wastebasket (see section XVI - Management menu).

XI. – Show exhibition reports

Select the requested exhibition

Place of Exhibition:	Sofia
Show data:	3. Durchgang EC Paare 2022
Show type:	Pair

1

2

3

Back and Enter corrections

Stop recording

Finalise capture

The entered exhibition data is now displayed again in the next view in the upper area.

- 1 In order to adjust the already entered data of the manually supplemented exhibition again, you can switch back to the entry screen here.
- 2 The data entry can be paused here for the time being. Recording can then be resumed under "Further supplement manual exhibition" (section XIV).
- 3 The data entry can be finished here and the exhibition can then be included in the seasonal evaluation.

XIII. – Create exhibition manually

The screenshot shows a web form for creating an exhibition entry. At the top are three buttons: 'Back and Enter corrections' (grey), 'Stop recording' (grey), and 'Finalise capture' (orange). Below these is a horizontal line with a yellow box labeled '2' on the left and a yellow box labeled '1' on the right, connected by a red arrow. The form fields include: 'Breeder:' with a dropdown menu and an 'Add new breeder' button (yellow box '3' points to the button); a radio button for 'Pair' (yellow box '4' points to it); 'Category Standard:' with a dropdown menu (yellow box '5' points to it); 'Score:' with a text input field (yellow box '6' points to it); a 'Save' button (yellow box '7' points to it); and 'Entries already recorded' with a 'Show entry' button (yellow box '8' points to it). Red arrows indicate the flow from the top line down to the 'Show entry' button.

1 The upper area with the recorded show data.

2 The breeder can be entered here

3 If a breeder does not exist in the selection, it can be added here.

See IV. Section "New Show" and Sub-item "Menu Add missing names" - here the entry of missing breeders is displayed - please pay attention to the correct spelling of the names.

4 Indication if pair or trio

5 Entry of the standard (A1 - C4)

Only the standard is recorded for the seasonal evaluation and not the other points such as ground colour and cover colour, these are not important for the seasonal evaluation.

6 Here the points are recorded.

Attention, only full scores or with .33 or .67 are allowed. It is irrelevant whether a full stop (.) or a comma (,) is used.

7 With "Save" the data record is saved and now appears with the already recorded entries (8).

It is no longer possible to restore it afterwards.
- 3 Restore the show
The show is then visible again in the corresponding displays in the programme.
- 4 Back to menu

XVI. – Management menu

Breeders administration

Management menu

Breeder administration (Only Administrator)

The screenshot shows a web interface for breeder administration. At the top, there is a 'Management menu' header. Below it, a sub-header reads 'Breeder administration (Only Administrator)'. The main part of the interface is a table with six columns: 'Selection', 'Last name / Surname', 'First name', 'Breeder's club', 'Country of breeder', and 'Entries'. The table contains five rows of data. The first two rows have their 'Last name / Surname' and 'First name' cells obscured by a large blue rectangle. Below the table, there are four buttons: 'Modify', 'Delete', 'Merging', and 'Back'. Red arrows with yellow numbered boxes (1-7) point to specific elements: 1 points to a checkbox in the 'Selection' column; 2 points to the 'First name' header; 3 points to the 'Entries' column; 4 points to the 'Modify' button; 5 points to the 'Delete' button; 6 points to the 'Merging' button; and 7 points to the 'Back' button.
